LIFE SCIENCES

EventX Life Sciences – Crossroads in healthcare

On the 8th and 9th of October Florence will host an international event in the life sciences, EventX Life Sciences - Crossroads in healthcare (EventX LS), a crossroads between research, clinical, market, innovation and health.

In the scenic spaces of Stazione Leopolda, healthcare stakeholders will explore partnering opportunities and discuss technological approaches and solutions developed and under development to address the challenges and opportunities in the current and coming life science scenarios.

In EventX LS you will find:

- **One-to-one meetings (EventX LS partnering event):** meeting sessions in which to explore and enhance your opportunities for research and development collaborations, project partnerships, insights on innovative solutions, service offering, business growth, investments with life science stakeholders (companies and startups, research organizations, clinicians, investors, service providers, institutions, clusters). Profiling and managing meetings is quick and easy with the [online networking platform](#).
- **Conference “The next health journey”:** how the health-related “moments” we can experience throughout our lives, from prevention and diagnosis to therapy and management of patient and healthcare facilities, are evolving. Two days of contributions and examples on upcoming and future implementation of solutions and technologies from experts in the field of the [Tuscany Health Ecosystem](#) project and other NRRP health-related initiatives.
- **Thematic workshops:** seminars on life science trends, hot topics and innovative solutions
- **Exhibition area:** opportunities to increase visibility, expand your network and learn about innovative solutions, expertise, products and services from partners and exhibitors.
- **Pinwheel Pitching Stage:** EventX LS will host the final part of [StartUp Breeze](#), in which its finalists will compete in front of investors and life science experts.

Attending sessions is **free**.

Register at: <https://eventxls-one2one2024.b2match.io/> up to the 1st of October 2024

EventX Life Sciences Partnering Event - EventX LS PE 2024

EventX Life Sciences Partnering Event- EventX LS PE 2024 is the partnering component of EventX LS. It will be carried out over the two days of the event (8-9 October 2024) as a place to explore opportunities, share experiences, plan new business ventures or research project collaborations, evaluate new investments, know innovative solutions and breathe the trends of the life sciences sector evolution.

EventX LS PE aim is to accelerate and multiply partnering among all the relevant stakeholders in pharma, medtech, digital health, nutraceuticals and healthcare.

Why participate

EventX LS PE is:

- an **unique opportunity to get known and find partners** for products and business development, licensing agreements, joint ventures, research collaboration, European project calls, investments, innovation insights;
- a **free showcase for your organization**; your profile can be created in 10 minutes and updated at any given time, staying online for 1 year;
- a **crossroad between research, clinical, market, innovation and health**;
- a wide network of organisations operating in the field involved in the event;
- a capillary organizational support;

Who EventX LS PE is for

Participants covering all the value chain of life sciences and showing a clear correlation with the target life science sector are welcome:

Target sectors	Who you will find at the event
• medical devices • pharma and biotech • digital health • nutraceuticals • related value chain	• companies and start-ups • public and private research organisations • investors • clusters, innovation agencies and organisations • Hospitals, healthcare facilities

Participation fees: none!

EventX Life Sciences is promoted by Fondazione Toscana Life Sciences, in collaboration with [Tuscany Health Ecosystem partners](#), Confindustria Toscana, the Enterprise Europe Network and other relevant players in the sector.

EventX Life Sciences is realized within the activities of the project “THE – Tuscany Health Ecosystem”, National Recovery and Resilience Plan (NRRP), Mission 4, Component 2 Investment 1.5, funded by the European Union – NextGenerationEU..

The Tuscany Health Ecosystem (THE) project aims to make Tuscany the "health region," pushing life sciences players (research, companies, clinicians) to develop applications and technologies to stimulate and support the growth and improvement of the health ecosystem in Tuscany.

*Approximately **1,400 researchers are involved in THE** with expertise spanning a very broad range of areas, covering topics from advanced radiotherapies and diagnostics in oncology, preventive and predictive medicine, advanced technologies, methods and materials for human health and well-being, nanotechnology for diagnosis and therapy, implementation and innovation for health and wellness, precision medicine and personalized health care, innovation in translational medicine, biotechnology and imaging in neuroscience, robotics and automation for health, and population health.*
